Township of Galway-Cavendish  
& Harvey  
Township of Cavan Monaghan

## FLOOD ADVISORY CANCELLATION / WATERSHED CONDITIONS BULLETIN

**DATE:** March 11, 2009  
**TIME:** 3:30 p.m.

**Message sent on the basis of information received from:**

**MNR – Surface Water Monitoring Centre  
Environment Canada  
Kawartha Conservation Flood Forecasting Network**

---

**Kawartha Region Conservation Authority advises that the Flood Advisory issued on Tuesday, March 10<sup>th</sup> is no longer in effect.**

**A Watershed Conditions Bulletin is now in effect.**

The system that has moved through southern Ontario overnight has brought considerably less precipitation than forecast. Precipitation gauges in various locations throughout the Kawartha Conservation watershed have recorded between 5.5 and 12.5 mm of rain over the last 24 hours. These amounts have not substantially affected water levels in local rivers and streams.

As air temperature falls below the freezing mark over the next three days, no additional runoff is expected and water levels will be decreasing.

Local rivers, streams and lakes, however, continue to be dangerous. Remaining ice cover is unsafe, riverbanks are extremely slippery and there is fast flowing water in many watercourses. Kawartha Conservation is asking all residents and children to stay away from all watercourses, as well as water structures such as bridges, culverts and dams.

Kawartha Conservation will continue to monitor local watercourses on a 24-hour basis, and advise the public and watershed municipalities of any changes. To report flooding, or if you have any flooding concerns, please contact Kawartha Conservation at 705.328.2271 or 705.344.0155 after hours.
