Township of Brock
Township of Galway-Cavendish
& Harvey
Township of Cavan Monaghan

WATERSHED CONDITIONS BULLETIN

DATE: May 8, 2009
TIME: 4:30 p.m.

Message sent on the basis of information received from:

- **Kawartha Conservation Flood Forecasting Network**
- **MNR – Surface Water Monitoring Center**
- **Environment Canada**

Kawartha Region Conservation Authority advises that Environment Canada is forecasting a significant amount of rain for the watershed over next 36 hours, as a strong cold front will move through southern Ontario. Amount up to 40 mm with additional 15-20 mm in local thunderstorms is predicted.

While no flooding problems are anticipated, water levels in local rivers and streams are expected to run at high velocities and elevated water levels.

Kawartha Conservation is asking all residents to keep their children and themselves away from all rivers, streams and lakes, as well as water structures such as bridges, culverts and dams as fast flowing water will result in dangerous conditions.

Kawartha Conservation will continue to monitor the situation on a 24-hour basis and will advise the public and watershed municipalities of any changes. If you are concerned about or are aware of flooding, please contact Kawartha Conservation at 705.328.2271 or 705.344.0155 after hours.
